

YARGUS 

Designed by **YARGUS** For Space And Loading Efficiency

Yargus offers two vertical blenders that are designed for more efficient loading and unloading. Solid construction assures years of dependable service.

Tapered Auger Vertical Blend Systems

Features an innovative flat-front design for lower dump height, a larger loader hopper for efficient loading, and a lower center of gravity for better stability.

- Available in 6-, 8-, 10-, 13-, 16- and 18-ton capacities

Single-Unit Open Top Blends Systems

Blends more quickly than most conventional and competitive blenders. The Yargus original blender is simple to operate and unloads rapidly in four different directions.

- 5- and 6-ton models feature a single auger
- 8- and 10- ton models feature a double auger
- 15-ton models offer larger hoppers with a double auger
